

### **Cllr. Olga Taylor**

Having spent my childhood and adolescence in the USSR, I moved to Olveston in 1996, and then to Pilning in 2000, where my husband and I built a house on our family farm.

I work for an IT company as a data analyst; and I am also a member of Orthopaedic Data Evaluation Panel, an independent panel of experts who benchmark medical implants.

As the Chairman of Pilning Station Group (formed in 2016) and I am an ardent advocate for public transport and sustainability,

I am trying to make a contribution to the local community with regards to transport, in the hope to improve the local environment and the quality of life in our Parish.
