

Do you live in a Flood Risk area?

If so, we need your help!

The Environment Agency is working on a project to improve the existing flood warning service in England. As part of this, we want to simplify how you register to get flood warnings and improve the messages you receive.

We are keen to talk to a wide range of people who could be affected by flooding; this includes flooding that might affect your property, a local area, local roads, a journey route or holiday destinations in England.

We want to share a new system with you and gather feedback to help us improve the service.

How do I take part?

If you are able to help us and can spare an hour of your time, please scan the QR code below to provide your details:
